

create a new react app

Step 1:

Install globally “create-react-app” with npm

```
C:\Users\Anna.DESKTOP-RLP7NAJ>npm install -g create-react-app
```

Step 2:

Change current path to the path that you want to store the new project

```
C:\Users\Anna.DESKTOP-RLP7NAJ>cd desktop
```

Step 3:

Create new project

```
C:\Users\Anna.DESKTOP-RLP7NAJ\Desktop>create-react-app first-project
```

choose a name to the new project

Step 4:

Change current path to the new project's path

```
C:\Users\Anna.DESKTOP-RLP7NAJ\Desktop>cd first-project  
C:\Users\Anna.DESKTOP-RLP7NAJ\Desktop\first-project>
```

Step 5:

Run the project with the “npm run” command:

```
cmd npm
Compiled successfully!
You can now view first-project in the browser.

Local:      http://localhost:3001/
On Your Network:  http://192.168.48.1:3001/

Note that the development build is not optimized.
To create a production build, use npm run build.
```

Step 6:

Get the following result in the browser:
